Education

- Bachelor of Science in Information Technology
Cristal-e College 2022-2026

Achievements

- Top 25 Finalist, DICT PSCX Regional Pitching Competition (Region VII)
- Best Presenter Award, Cristal-e Research Congress Project: CristalGrade – Integrated Grading System
- Symmetrical Multimedia Club Officer

Personal Strengths

- Strong willingness to learn and adapt to new technologies
- Able to work independently or as part of a development team
- Good communication and documentation skills

Professional Objective

BSIT student seeking an On-the-Job Training (OJT) opportunity in a software company where I can contribute hands-on experience in developing and maintaining web-based systems using Laravel and MySQL. Experienced in building a real-world academic grading system, with strong interest in system design, deployment, and continuous learning.

Featured Projects

CristalGrade — Integrated Grading System

Full-Stack Web Application | Laravel, MySQL, Tailwind CSS

- Designed and developed a role-based grading system for faculty and students
- Implemented secure user authentication and access control
- Structured and managed relational databases for students, classes, activities, and grades
- Incorporated faculty feedback to improve usability and system workflow
- Prepared technical documentation and defended the system during academic evaluations
- Managed the system lifecycle from requirements gathering to testing and presentation
